

I just want it to be known for the record as a viewer of public television and a mother of four -I am outraged at the things that are allowed to be shown on television. I don't know if my message will make a difference but we wonder why society has gone to the place where it is - sit down and watch some of the broadcasts that are on - you won't need to look much farther. I realize my job to train my children begin at home and I do not use the television as a babysitter but there is many things on that even I am offended at. When it comes to the point you much monitor the content of the cartoons even - there is a problem. My household watches only shows from 10 years ago and longer because anything else is filled with immorality and vulgar language. I hope the FCC will begin to crack down and only allow more wholesome shows but at a minimum - clean it up some! Thank you.
